

REFORM UK WANT

TO DIVIDE US.

LET'S STAND TOGETHER

FOR A BETTER FUTURE.

**EDINBURGH
CLIMATE
COALITION**

REFORM UK **ARE** THE ESTABLISHMENT.

Reform UK presents itself as an “anti-establishment” force — but it is backed by the same millionaires, billionaires, ex-Tories and fossil fuel money that have blocked climate action for years. You can’t fix a broken system by handing it to the people who benefit from keeping it broken.

A WAR ON JOBS.

Reform attack renewable energy, but this is an attack on jobs. It puts hundreds of thousands of existing green jobs at risk and blocks the climate jobs our communities urgently need. Their promises to workers ring hollow: they want to weaken employment rights and make jobs more insecure, not safer.

HIGHER BILLS, NOT LOWER.

More North Sea drilling won’t cut energy bills; renewable energy is already cheaper to produce than oil and gas. Energy prices are set globally, and oil companies pocket the profits. Instead, insulating our homes would make us all warmer and save us money.

NO PROTECTION FROM CLIMATE CHAOS.

2025 was the hottest year on record. Heatwaves, floods, wildfires, crop failures, and rising food prices are already here. Reform UK promotes climate denial. Ignoring reality won’t stop disasters; it guarantees more of them.

THERE IS A BETTER ALTERNATIVE.

Climate action and fairness go hand in hand. Invest in home insulation to make our houses affordable to heat; clean, cheap wind and solar power, free public transport; and secure, decent jobs. Put communities first — not corporate donors.
